

Full-Stack Web Developer & Software Engineer

Crafting innovative digital solutions with modern technologies.
Passionate about building scalable applications and continuous learning.

[View My Work](#)[Get In Touch](#)

I'm an undergraduate student at IIT Jodhpur pursuing a Bachelor's degree in Engineering and Computer Science. With a strong foundation in full-stack web development and software engineering, I'm passionate about building scalable solutions that make a real impact.

Currently enrolled in the Leapstart School of Technology for intensive tech skills development, I'm actively developing projects across web development, software engineering, and Linux automation. I believe in continuous learning and collaborative development practices.

My goal is to build expertise in end-to-end full-stack development and contribute to innovative projects that leverage emerging technologies.

Education

Bachelor of Technology, IIT Jodhpur (Expected 2029)

Currently Learning

Advanced full-stack development and software architecture patterns

Looking For

Made with Manus

</> Technical Skills

Web Development

HTML5, CSS3, Responsive Design, DOM Manipulation

Programming Languages

Java, Python, JavaScript

Development Tools

Git, GitHub, Linux/Ubuntu, CLI

Specializations

Full-Stack Development, OOP, Version Control

Soft Skills

Problem-Solving

Methodical approach to technical challenges

Quick Learner

Rapid skill acquisition and adaptation

Made with Manus

Technical Documentation

Clear communication of complex concepts

Interactive Web Applications

Built responsive web applications using HTML5, CSS3, and JavaScript with modern design principles and smooth user interactions.

HTML5

CSS3

JavaScript

Responsive Design

Object-Oriented Programming

Developed robust Java applications demonstrating core programming concepts, design patterns, and best practices.

Java

OOP

Design Patterns

Made with Manus

[Linux](#) [Bash](#) [Automation](#) [CLI](#)

Version Control Mastery

Demonstrated collaborative development practices using Git and GitHub for professional project management.

[Git](#) [GitHub](#) [Collaboration](#)

Full-Stack Development

Comprehensive learning projects covering web development, programming, and software engineering concepts.

[Full-Stack](#) [Web Dev](#) [Software Engineering](#)

Problem-Solving Portfolio

Collection of algorithmic solutions and technical challenges demonstrating methodical problem-solving approaches.

[Algorithms](#) [Data Structures](#) [Problem-Solving](#)

Full-Stack Web Development Projects

Ongoing

Developing interactive web applications with HTML5, CSS3, and modern design principles. Implementing responsive layouts and smooth user interactions.

Java Programming & OOP

Ongoing

Building object-oriented applications demonstrating core programming concepts and design patterns. Focusing on clean code and best practices.

Linux System Administration

Ongoing

Creating system utilities and automation scripts using Linux/Ubuntu. Demonstrating proficiency in command-line tools and system administration.

Version Control & Collaboration

Ongoing

Managing code repositories and collaborating using Git and GitHub. Demonstrating professional development practices and team collaboration.

 **Bachelor of Technology** 2025–2029**Indian Institute of Technology (IIT) Jodhpur**

Engineering and Computer Science

Full-Stack Development Software Engineering Linux Administration

 **Leapstart School of Technology** 2025–2029**Intensive Tech Skills Development**

Industry-Ready Training in modern web development, software engineering, and emerging technologies.

Let's Connect

I'm always interested in hearing about new projects and opportunities. Feel free to reach out through any of the channels below.
